

# Group Meeting - 2 hours

Group 5

24.04.18

**Team attendance:** All Members present

We have decided on which of the functionalities we want and can implement this iteration. We have decided to chose: - Offer another non-trivial rule set for chess. (Remember to explain the rules.) - Chess Tutor commenting on moves you make and telling to win the game in 3-5 moves. - Cool animation of moves.

Since we already have the coolest animations. We will have the main focus on function 1 and 2. More detailed tasks will be given on the next meeting on thursday.
