

Group Meeting - 4 hours

Group 5

22.03.18

Team attendance: All team members

Updated every document and diagram according to what we have done in this oblig. Made a sequence diagram and rewrote the retrospective with goals and wishes for the next oblig. Started to rewrite the product specification according to what our project turned out, since we changed a few things since last oblig. Started to implement the login system and highscore overview. Our plan is to be finished with the whole project today, so when the presentation starts tomorrow all of our content is on the master branch.
