Group Meeting - 2 hours

Group 5

20.03.18

Team attendance: All team members

Now an AI with 3 difficulties are implemented. Now the game is playable, with a player that can play against a player or an AI with 3 difficulties. The AI can also play against an AI - fun to watch. Changed the GUI design to be more visual pleasing with more settings. Started on the presentation. Started on the end process of the project. In need of updating old diagrams and documents to current state. Now the player can add the names of who is playing at the moment, and the name will be shown while the game is being played - along with score. Score is not fully implemented yet - but will be until next time.
