Group Meeting - 2 hours

Group 5

12.04.18

Team attendance: All team members

Progress on SQL database, now we can connect to the database. We are working on connecting the database to the score class. Was harder than anticipated. Now you can choose the black pieces and it shows the black pieces at the bottom instead of on the other side. We are discussing what we are doing next oblig and other things that we might implement. Started on fixing documents so they are up to date.
